People's Voice, Uprising to Save Their Homeland

This brief article reflects the opinion of overwhelming majority of the people of Afghanistan. New American administration needs to listen to the voice of the people of Afghanistan not to the incompetent, corrupt and authoritarian regime of Ashraf Ghani which is a continuation of the corrupt regimes being installed by rigging and fraud since the Bonn conference. This regime is the outcome of Mr. Khalilzad's failed mission in Afghanistan. He should be sidelined from further infuriating the people of this country. This is not the opinion of a single person, reporter, observer, or current affairs analyst of Afghanistan to be strangled, this is the voice of all people which is whirling before a storm.

Those who seem great is because we are crouching, so let us stand up.

In social media, I often write, like many others, about the suffering of the people of Afghanistan, such as suicide attacks and explosions, the captivity of soldiers, about injustice, corruption, betrayal, and crimes. But when I read the opinions of some fellows connected to hierarchy, they say, "we cannot do anything about the situation which has not been formed by us. They asked what the solution would be?"

People who believe that they have nothing to lose, believe that they cannot fight. They cannot stand against injustice, cannot defend their homeland against tyranny, destructive ideas, and injustices They cannot claim to be part of a nation, they do not deserve to say, "we are Afghans, and we are from Afghanistan." One who bows down to injustices, inequalities, prejudices, and surrenders, one who does not tell the truth is neither a Muslim nor a believer in God Almighty. Therefore, that country will have difficult days ahead.

In this land, Afghanistan, where good seedlings have shrivelled, and the bad cultivation has unremittingly been flourishing; crime and terror do not cease at all. So, who owns this land? Who is responsible for shedding all human blood and destroying incessantly this wailing

nation? This country is in fact without owner and population. The famous proverb says, "A place will have only one owner, the place without an owner has hundred owners." The owner of Afghanistan are the people of Afghanistan. But do you know who owns this land now? America, Pakistan, Taliban, ISIL, al-Qaeda, arrogant gunmen, roaming parachuted scavengers, or the wounded and disappointed people of this country?!

I tell you, the terrorist Taliban, the murderous Taliban are in an ambush to seize all power. And if this government and this incompetent leadership incite more divisions and hypocrisy, and continues to be indulged in corruption and theft, and do not work to strengthen the unity among all residents and tribes of Afghanistan, believe me and other observers, its fall is inevitable. And it will have a very bloody and deadly collapse.

Let us all, for the sake of our homeland and the people, and for the sake of God, let the homeland not fall in the hands of the criminal Taliban. And let us send these corrupt people again empty-handed from where they came with their empty boxes. Leaders who wait day and night for when Mr Biden calls them, when he laughs at them? They do not feel ashamed of themselves. They do not have any dignity nor credibility. Why they do not refer to the nation and the people of this country. Why do they not listen to what their nation tells them?

Let this government harass us, but at least we raise our voices through the media. Let us unite, let us empathize, let us not cultivate more discord and divisions. How long will you continue to be mercenaries? It is enough that Taliban have chosen to be foreign mercenaries. You rulers do not become more mercenaries of aliens, the Jews, and Christians.
